WHITWORTH COLLEGE

# Campanile Call

NOVEMBER—1960

## Homecoming - 1960

*Lovely Miss Linda Moore is Queen of the 1960 Homecoming. Queen Linda I, a senior, is from Naches, Washington.*

Jim Quigley

## From the President's Desk

Dr. Frank F.  
Warren

### HOMECOMING 1960

By PRESIDENT WARREN

Again we are at the time of year when graduates the country over are returning to their Alma Mater, there to re-live old days, old experiences and to become acquainted with new teachers, new buildings and the new student body. I shall have unusual pleasure in welcoming this year's *Home-Coming* crowd. I remember with pleasure the small but enthusiastic group of graduates and former students who gathered with faculty and friends in a banquet hall in the Davenport Hotel. That day we had played Carroll College and the score was 13-6. However, to me it was a significant day for it was my first opportunity to meet some of the graduates of Whitworth.

I remember how pleased we were to find a loyal group, an Alumni Association that looked forward to the time when their Alma Mater would be a strong college with an active, large alumni association.

Many *Home-Comings* have passed and there have been occasions when the college had every right to feel optimistic concerning the future for there was a loyalty and a love for Whitworth that could but auger a bright future. *Home-Coming* 1960, finds the Alumni Association on its way as a strong right arm for the College. Under the excellent leadership of Roy Dimond and backed each year with a dedicated Alumni Board, the Association has become a mighty factor in the building of a greater Whitworth. Many of our finest students today have come as a result of the work of loyal alumni. Then, too, as our graduates have come to places of leadership and financial status, their gifts to the Association and to the College have brought great encouragement to the Administration. Often when talking to business men concerning the college the pertinent question is asked, "What is your Alumni Association doing?", or "What is the attitude of the graduates toward their Alma Mater?" We have been able to give positive answers to these questions. Up and down the coast, in the mid-west, the far east, in Hawaii, Alaska, Thailand and other distant countries we have active groups of graduates.

## MANY SECOND GENERATION WHITWORTHIANs

We have waited long for the time when the sons and daughters of Whitworth graduates would come to the college of their parents. That time has come and we know of at least 14 men and women whose parents were either graduates or former students. This is just the beginning of a new and great day for the College we love. Each preceding year will doubtless bring more and more sons and daughters of graduates and former students.

### HAIL TO OUR FOOTBALL TEAM

Under the inspiring leadership of Coach Adams, the Whitworth team continues to bring honor and praise to our campus. Holding several national statistics at the present, it is possible that by the end of this year, Whitworth will be able to look back upon another great year in this sport as well as in others.

### FACULTY ADDITIONS STRONG

Already we have every reason to believe that academically this should be a great year. The faculty, both new and old, realize that we have a student body of young people who seek for academic excellence. We are particularly pleased with the fine spirit of cooperation demonstrated by the six new members of the staff and feel fortunate in having them as a part of the Whitworth family.

### DEVELOPMENT PROGRAM FORGES AHEAD

Mr. Ed Wright is finding much to please him as he takes over this new responsibility. He has been well received by the faculty, the church and the community and already has demonstrated that while here he will have but one great interest, the development of the financial structure of the college in all of its ramifications. We have the campus, the faculty, the student body and the good wishes and prayers of thousands of people. Our task now is to coordinate all these publics and go forward with a program that will be vital and progressive. We see nothing but a good year of great progress as we face the future. *Home-Coming* should be a gala occasion to be remembered by all.

## Auxiliary Activities FALL AND WINTER PROGRAMS PLANNED

MRS. GRANT DIXON

The month of October was marked by increased activity in four areas of the State as Executive Boards and Committees of the Women's Auxiliary planned their fall and winter programs.

The Spokane Chapter, Mrs. Willard Graham, president, held its Autumn Tea at the Student Union Building Monday, October 17th. Professor and Mrs. Loyd Waltz were featured in a presentation of "Robert of Sicily" from "Tales of a Wayside Inn." Miss Ann Murray, senior music major, sang. Mr. Edward Wright, Director of Development, spoke briefly of his program. This was the Annual Membership Tea. Tuesday, November 15th, is the date for the popular Christmas Bazaar and luncheon which will again be held at the First Presbyterian Church. Mrs. Charles Strausz is the chairman.

The Seattle Chapter, Mrs. David L. Jones, president, met on October 10th to plan for its Fall Membership Tea.

Mr. Wright will be the featured speaker, and Mrs. Kenneth Myers is arranging for musical numbers. This Chapter is planning a Christmas Hobby Sale in November with Mrs. Edward May as chairman.

November 1st is the date chosen by the Tacoma Chapter for its initial membership effort. Mrs. Leo J. Forsberg is serving as Temporary Chairman and has as Committee members Mrs. John Klebe, Mrs. Russell Alsgaard, and Mrs. John Cauvel. The Committee has met and completed one of the most difficult and necessary tasks, that of bringing the mailing list up to date.

In Wenatchee last spring this preliminary work was accomplished by Mrs. Bernard Nelson, Mrs. Sheldon Price, Mrs. C. R. Mohler, Mrs. Paul Leavers, Mrs. Dale Hanner and Miss Esther Stevens. Mrs. Price is arranging for a Fall Tea to present Professor and Mrs. Waltz in Wenatchee—the date to be announced soon.

At this time there are well over 1200 women on Auxiliary mailing lists—helping to build for Whitworth a future worthy of her past.

A gift from Mr. Edwin Molander, college architect who has designed the last six buildings on this campus, and who also was the donor of the campanile tower.

# SCIENCE LIGHTS THE CORRIDORS AND LEADS THE WAY

By HOMER ALDER, Ph.D.  
Head of Science Division

Never in the history of mankind has science been more in evidence than at the present time. Its basic position among the disciplines available to man has been intensely emphasized by the overpopulation increasing the need for food, added protection against disease, and survival against the aggressions of communism. All of this has stepped up the science tempo in the public schools—grades, high schools, colleges and industry. Cancer and virous research has brought into sharp focus the need of more work being done in cell physiology and radio-isotope studies. The Salk vaccine is a result in evidence.

The Department of Biology offers courses leading to graduate study, preparation for teaching life science subject matter, and meeting preprofessional requirements for medicine, dentistry, medical technology. In the last 12 years Whitworth College has sent 36 students to medical schools and many others to schools of medical technology.

At the present time there are 62 majors in the Department of Biology and a total registration of 300 students divided among 9 courses. There is a staff of 3 instructors and the plans for next year call for 4 full time instructors and the offering of 4 new courses—ornithology, entomology, bioecology, and mammalogy.

The Department sponsors a Pre-med Club and an honorary biological club known as Beta Beta Beta.

Biology majors are encouraged to do research work in various fields. At the present time one student is working on bat migration and habitat problems of bats, another is studying the effects of tranquilizers on guinea pigs, a third is studying natural control of dormancy in seeds, and a fourth, Carol Holler, is working on growth regulation substances and their influence on germination and growth of seedlings for her work in the College Honors Program.

## Chemistry Program Emphasizes MODERN VIEW OF SCIENCE

By H. W. JOHNSTON, Ph.D.

The Chemistry Department offers the bachelor of science degree fully approved by the American Chemical Society. In addition, the bachelor of arts degree is offered for those who desire a less stringent science program. These students usually are preparing for high school teaching. In addition, a large part of our time is devoted to service to students going on into the medical and dental schools, graduate work in biology, and the degree nursing program. Fundamental courses in chemistry are offered to nursing students at the Deaconess Hospital.

At the present time considerable research is carried on in the Department and two publications have appeared in professional journals during the past year. One student, Mr. Andrew Tsoi, is enrolled in Whitworth College's Honors Program and is doing his work in chemistry. Five other students are involved in the research program as part of their junior and senior work. Research in the Department is supported at the present time by grants from the Research Corporation and the Petroleum Fund of the American Chemical Society.

The Department also encourages participation of its students in extracurricular relationships with professional chemists and student chemists from other colleges. Members of the student body are involved in the Tri-School Chapter of Student Affiliates of the American

Chemical Society. Frequent field trips are sponsored by this organization in cooperation with Gonzaga University and Eastern Washington College of Education.

The Department believes in presenting a thoroughly modern view of science, and in this connection has purchased modern equipment such as is comparable to that used in most industrial laboratories and in the universities. This equipment has been enjoyed by all students at all levels of instruction.

The Department, in cooperation with other departments in the Division, sponsors visits of distinguished scientists to the campus to present their specialties before science classes and upon occasion to present general talks to the public at Chapel programs.

Andrew Tsoi, foreign student, senior major in Chemistry. Machine in picture—"Automatic fraction collector."

## Physics Features

## LIGHTNING RESEARCH

By WILLIAM G. WILSON

Today physics is achieving its greatest recognition as "the basic science," the foundation on which others stand, the tool which others use. Television, jet planes and missiles, satellites and space ships, transistors and computers have become common knowledge and the future of physics is as boundless as time and space.

The physics courses at Whitworth College are planned for three groups: those who seek a general education, those interested in elementary and secondary teaching, and those looking forward to graduate study and to industrial physics or college or university teaching. The opportunities are great and many; the demands are rigorous. He or she who would succeed must be competent and truly dedicated to expanding present knowledge and to making it serve well his fellow men.

Research is presently going on regarding the electric charge separation which occurs when water is freezing. This enters into thunder cloud development and has far reaching geophysical implications. A recent grant from a research foundation provides the College with some special equipment and for talented undergraduate students having a part in the study. Here is a challenging opportunity for study and growth, all as a part of a Christian campus community.

# AREA CLUB MEETINGS DRAW ALUMNI INTEREST

The fall season is rapidly developing as a favorite time for Whitworth Alumni to hold "reunions" in various parts of the country. Portland area Alumni held a meeting late in September. Alumni of Southern California are sponsoring a banquet on the Friday evening following Homecoming. The next evening will see Alumni of Northern California gather for their annual meeting and banquet.

Whitworth Alumni of the Portland, Oregon area chose a happy occasion to hold their fall meeting. On September 24, a large contingent attended the football game, between Lewis and Clark and Whitworth, which saw the Pirates emerge victorious. Following the gridiron struggle the Alumni held a meeting on the LC campus in facilities made available by the sister institution.

Approximately fifty Alumni attended the coffee social and business meeting which was presided over by Lou Starner, '57, area club president. Dr. Warren spoke to the group about new faculty and other matters relating to the start of a new academic year. Coach Sam Adams, '53, related some of his philosophy of coaching and indicated that the major reason for the success of the team was directly attributable to a keen sense of competition, an overwhelming desire to succeed, and a loyalty to teammates which produces a team effort, all of which find their base in striving to excel as a Christian.

Roy Dimond, '48, Director of Alumni Activities, also introduced Helmuth Bekowies, '48, Director of Admissions and Milton Erway, Director of Public Relations. To conclude the business session an election of officers was held. Chosen to direct the program of the Portland area club for the next year were Bob Davis, '51, president; Bill Hillman, '58, vice president; and Marilyn Travaille, '59, secretary.

The Homecoming atmosphere will be transferred from the campus to both the north and south sections of the state of California on the first weekend of November. On Friday evening, the 4th, Dr. Clarence J. Simpson, professor of English and Head of the Humanities division, and Roy Dimond will journey from the campus to join with Alumni of southern California. This first meeting of the weekend will be at 6:45 p.m. at the Chicken Dining Room of Knott's Berry Farm in Buena Park, California. Ron Jongeward, '57, is in charge of arrangements and is accepting reservations for the dinner.

(Continued 3rd Col.)

## Scholarship Granted ALUMNI AWARD GOES TO CALIFORNIAN

The Alumni Scholarship for the academic year 1960-61 was awarded to Angela Grande, '64. Miss Grande claims Fillmore, California, as her home town. She attended the Fillmore Union High School of that community where she ranked 5th academically in her graduating class. This standing is enhanced by a knowledge of the course of study which Angela pursued. Her high school transcript reveals sound college preparation in 4 years of study in each of the following fields: English, Mathematics, History, and Spanish. She also took a course in Biology taught on the college level.

As has been true of Alumni scholarship recipients in the past, Miss Grande did not devote all her time to matters academic but was quite active in extra curricular events. During her junior year she was an active member of the Science, Math, and Spanish clubs as well as serving as class treasurer. The same year she held the assignment of assistant features editor of the school annual, acted as co-chairman for the annual science fair and awards banquet, was president of the modern dance club and performed in the Christmas pageant.

During her final year in high school Angela was promoted to the editorship of the annual, and sole chairman of the science fair. At the same time she maintained active membership in the previously mentioned clubs. To provide an additional challenge Angela worked with junior high students as a student gym teacher.

Miss Grande has selected teaching as her future vocation. She has chosen Spanish for her college major and looks forward to minor-ing in French and Education.

Alumni are invited to present nominations for the Alumni Scholarship to Roy Dimond, '48, Director of Alumni Activities.

## ALUMNI CONTINUE FINANCIAL SUPPORT

The Alumni Association closed out the financial year with the college by providing an all-time record high in financial support of \$22,-216.64. This covers the twelve-month period from September 1, 1959 to August 31, 1960 to correspond with the college's fiscal year. The figure reported in the September issue of the *Campanile Call*, which varies slightly from the above amount, reflects the total recorded during the Alumni fiscal year which runs from June 1 to May 31.

The current drive, although not officially launched, provides every indication of being well underway. It has been six months since a Fund mailing has left the campus destined for homes of Alumni, yet during the past several weeks Alumni have produced funds in excess of \$2,500.00 in support of the Alumni Association and College.

Bill Rusk, '55, Fund Drive Chairman, has "drafted" Jim Quigley, '53, to work with him in the production of promotional material for the 1960-61 Alumni Fund. The two have

spent many hours working both independently and together in developing materials to be used in relating the message of the current drive.

"At this time of year when we are all planning our budgets and rethinking our stewardship programs, real effective support can be provided to Whitworth College by monthly participation in the Alumni Fund," Rusk said. He continued, "We encourage each Alumnus to take the initiative with regard to the Fund. Don't wait for the first mailing, but invest in Whitworth today!"

## AREA CLUB (Cont.)

On the following evening, Saturday, November 5th, Whitworth "Homecoming" will move to Oakland and the Villa De La Paix. Dr. Simpson and Mr. Dimond will again represent the college at a 7:30 p.m. banquet and business meeting. Assisting Spencer Lewis, '51, area club president in developing final plans have been Sandy Gillis Moser, '59, Bernice Woodhead, '51, Bill Lew, '50, Eunice Buckley Wilson, '52.

# Alum News

## 1944

Florence Reynolds Sayre, '44, and family are enjoying an extended visit in Ohio, for the last half of their furlough from their mission station in Rhodesia, Africa.

## 1945

Bob McGrath, '45, was soloist with the Seattle Symphony in a series of 12 family concerts. This summer, he played the part of Rudolph in Puccini's *La Bohème*. Bob has just made a recording bearing the Sacred Recording label. It has gone out for national distribution this past month.

## 1947

John Duvall, '47, pastor of the Palms Church, EUB, in Los Angeles, reports the dedication of a new church building this past month.

## 1948

Bob Bradburn, '48, reports that 16 hour workdays are the rule for him in his assignment at Lampang, Thailand. Many of Bob's friends are dedicated to attaining a new jeep for his work which will replace a 12-year-old model.

## 1949

Marion Pond, '49, after being home a year on furlough has returned to the Soudan Republique, to work as a missionary nurse-teacher. She has had this assignment since 1951.

Michael James, born September 4, in Spokane, to Norman, '49, and Donna Vandemeer Dorpat, '49. Mike has two sisters, Paula 8, Kristine 5 and a brother, Norman Theodore 7.

Ron Snelling, '49, recently left Alaska in accepting a call to be the pastor of the Terrace Heights Presbyterian Church, in Yakima, Washington.

Peter Earl, born August 7, in Merced, California, to Earl, '49, and Brownie Mortlock. Earl has accepted a call to the Valley Baptist Church, Merced, California.

## 1950

Casey Gilbert, born September 7, in Santa Cruz, California, to Bill, '50, and Colette Stirm Gwinn, '49.

Kent Thomas, born July 10, in Bristol, Virginia, to Charles, '50, and Edyth Bovee. Chuck lists his current address as the Columbia Theological Seminary in Decatur, Georgia.

Alva Virtue, '50, after 4 summers of study at the Instituto Allende at Guanajuato, Mexico, has received her Master of Fine Arts degree. This year she is teaching art in the Central Valley School District.

## 1951

Susan Kay, born September 27, in Tacoma, Washington, to Phil, '51, and Shirley Gilson Schiller, '51. Sue joins two brothers, Stephen 8, Thomas 2, and a sister, Sandy 6.

After having served 3 years in England with the Air Force, Bob, '51, and Geraldine Buob Shreve, '55, have returned to the states. At present Bob is employed by the National Security Agency at Fort George Meade, Maryland.

Peggy Gazette, '51, is in Columbus, Ohio, studying for a Doctor's degree, at Ohio State University.

Harvey, '51, and Corinne Weber Polley, '50, have completed a year's study in Brussels, in preparation to serve at a mission station in the Congo. The political and military situations in that country have required a temporary revision in plans.

## 1952

Patricia Lee, born July 26, in San Jose, California, to Bill and Floy McKee Lundy, '52.

Julie Elizabeth, born August 20, in Portland, to Mal, '52, and Dolores Yandle Bolen, '55.

Brent William, born August 2, in Wenatchee, Washington, to Bernie, '52, and June Ramage Nelson, '52.

## 1953

Mary Lee Neil was married to Bill Tatum, '53, on June 12, in the University Presbyterian Church of Seattle, Washington. Bill continues as associate pastor of the First Presbyterian Church, Colorado Springs, Colorado.

## 1955

Helen Christine, born August 13, at the U.S. Air Force Hospital in South Ruislip, England, to Hosea, '55, and Helen Phillips.

Helen Greiner, '55, an Alumni Ideals award winner, has returned from Lebanon and is teaching in the high school of Port Townsend, Washington.

Fritz Ridenour, '55, while continuing his work with Gospel Light Publications, has enrolled in Fuller Theological Seminary.

## 1956

James J. Staggs, '56, is principal of the Emerald Empire Christian School, Eugene.

Donna Louise Witter, '56, was married to Barry James Roberts on August 6, in the First Presbyterian Church of Medford, Oregon. Donna reports that she met her husband in Europe, while she was a member of the 1958 Whitworth Tour.

Loana Painter, '56, was married to James Berghold on July 9, in the Twin Lakes Baptist Church, of Santa Cruz, California. This fall, Loana is teaching in Soquel, California.

Dick Jordahl, '56, is the Youth Director at the Twin Lakes Baptist Church in Santa Cruz.

## 1957

Hector R. Lazo, '57, has graduated from the American Institute for Foreign Trade and has embarked on a foreign trade career with the Reynolds Metal Company.

## 1958

Carolyn Cole, '58, was married to Roger Rutherford on June 18, at Ladd's Addition Evangelical United Brethren Church, Portland, Oregon.

Joyce Ellis, '58, is teaching at the American College for Girls, in Cairo, Egypt.

Nancy Donner, '58, while working on a Master's degree, is a research assistant in the school of Journalism at Montana State University, Missoula, Montana.

Julie Kristen, born September 20, to Robert '58, and Marilyn Gould Gray, '58.

Max Sinn, '58, is coaching the Lacrosse, Washington, high school basketball and baseball teams.

Helen Patricia O'Donahue, '58, was married to John David Pembroke, on July 29, at the Mt. Laki Community Presbyterian Church, Klamath Falls, Oregon.

## 1959

Alice Brubacher, '59, has been granted a Master of Arts degree by the University of Michigan. She is an instructor in English at Seattle Pacific College.

Susan Virginia Riley, '61, was married to Ronel Warren Giedt, '59, on September 9, in the Millwood Community Presbyterian Church.

Dennis Hagen, '59, is teaching music in the Orting, Washington, High School and Edgerton Grade School.

Rodney Fendall, '59, has been commissioned an Ensign in the United States Naval Reserve, and is serving at the Naval Supply Corps School in Athens, Georgia.

Sandra Gillis, '59, was married to Raymond Moser, on June 25, at the Northbrae Community Church, in Berkeley, California.

Virgil, born July 13, in Seattle, to Cliff, '59, and Eleanor Maier, '59.

## 1960

Janet Anderson Hagen, '60, is teaching the 4th grade in Edgerton Elementary School in Orting, Washington.

Gregg Allen, born September 5, in Quantico, Virginia, to Marilyn and Ronald Lince, '60. Ron is in Marine Corps Officer's Basic Training at Quantico.

Tammy Rue Abell, '60, was married to Lawrence Stewart Reid, '60, on August 27, in the Edinger Memorial Chapel on the Whitworth campus. They are living in Port Angeles where Larry is coaching in the Junior High School and Tammy is a substitute teacher.

Louise Herbage, '60, is teaching the 4th grade class in Antioch, California. She reports her class has 5 girls and 18 boys.

Dick Barney, '60, is working for the Department of Public Assistance, State of Washington, with an office in Seattle.

Catherine Anne Lund, '60, was married to Ronald Frank Taylor, '60, on September 4, at the First Presbyterian Church, Walla Walla.

Jon Adams, '60, is assistant to the Food and Beverage Control Manager in the Sherton Hotel, Portland, Oregon.

Charles Strawn, '60, has entered Louisville Seminary.

## Creativity Seen in CONTEMPORARY MATHEMATICS

By JOHN A. CARLSON

To many laymen "mathematics" is the science which develops the art of rapid calculation and a good mathematics student is one who can manipulate his figures with adroitness. A few sessions in the study of modern mathematics is decidedly devastating to such naive conceptions. It is true that one facet of applied mathematics concerns itself with the development of new and rapid techniques of computation, such as the amazing accomplishments by the "electronic brains," and yet this is as a tiny island compared with the tremendous continent of modern creativity in mathematics.

Contemporary mathematics concerns itself more with the underlying structure of mathematical systems than it does with the mere elaboration of computational details. High premium is placed on the growth of ability to reason correctly, to draw valid conclusions, and to recognize invalid conclusions.

The program in mathematics at Whitworth is under constant revision to keep its offerings alive and up-to-date. The development of modern concepts in mathematics has extended its applications far beyond the traditional engineering and physical sciences curricula.

The subject matter of sets, probability, statistics, matrices, and "game theory" is being exploited in the application to biology and in the behavioral sciences. Exciting applications to economics and even to political strategy are evidences of expanding horizons.

That Whitworth students are showing an awareness of the importance of mathematics is evident from the increased enrollment and the bi-weekly sessions of the new mathematics club. With six mathematics majors in the Junior and Senior classes there is a new interest in upper division offerings.

## New Department GEOLOGY PROGRAM UNDERWAY

Perhaps no other area in America is so richly varied in its geologic features than is the Spokane area. It was this single fact that led Dr. Homer Alder, department chairman in biology, to begin teaching a historical geology course several years ago. Judged by student response, others shared Dr. Alder's viewpoint and the result has been the addition this fall of Mr. Edwin Olson, a geochimist, to the Whitworth Science Division.

In line with the present trend in geology, the geology program planned will emphasize the basic scientific tools of mathematics, physics, and chemistry and their applications to geologic problems. With a natural laboratory so close at hand, field studies will also come in for emphasis.

## THE NEW LOOK IN HOME ECONOMICS . . . . .

By MARY BOPPELL

A bachelor of science degree in Home Economics prepares a student for several types of positions. Recently we have had graduates go into the fields of extension service, teaching, dietetics (after an additional year of specialized work). The "extra dividend" of home economics training is the double use to which it can be put—in a paid professional career and in homemaking.

The addition of Mrs. Isla Rhodes to the Home Economics faculty marks an important step forward for this department. She will teach Food Preparation and Nutrition courses, Child Development and Housing. Students have displayed much interest in the Housing course, offered for the first time this fall. Women arriving for their first Nutrition class were surprised to find men enrolled in the course. The Physical Education Department is recommending that majors in that field take Nutrition. Some courses which have been taught alternate years can now be taught annually, and several new courses are to be added.

Living in the Home Management House continues to be one of the most valuable experiences of each Home Economics major. The House is open to students both fall and spring semesters this year. Time spent here involves time, energy and money management, as well as practical application of knowledge in meal planning, shopping, serving of meals and entertaining. With several pieces of equipment on annual replacement contracts, the house is well equipped.

Whitworth College Home Economics Department has gained several distinctions recently. Again, our students took the top two awards at the last annual district finals of the "Make It Yourself With Wool" contest. Two of the state College Home Economics Clubs' four officers were Whitworth College girls. Patricia Mohler was state president, and Betty Curryer was state secretary. Miss Mary Boppell, head of the department, is this month visiting Willamette University as a member of an evaluation committee appointed by the Northwest Association of Secondary and Higher Schools. This is the third time that she has participated recently in such evaluations.

## Expansion and Enrichment in THE NURSING CURRICULUM

By MRS. ROBERTSON

The Nursing Department is expanding and enriching its course offerings and is working toward accreditation by the National League for Nursing, which is the professional organization for nursing education.

Although the nursing program was started in 1941 its major emphasis, until recently, has been on the Deaconess Hospital School of Nursing affiliation which has proved quite successful and is being continued. Some students take pre-nursing subjects to enable them to enter a degree program in nursing in another college or university or to complete work for a degree at Whitworth after becoming graduate nurses.

It is this degree program that has been receiving special attention. Graduate nurses who wish to work for a B.S. degree with a major in nursing must meet Whitworth's general requirements for graduation including a minor in a related field.

In order to meet League requirements nurses must have public health nursing preparation including field work experience. Whitworth first offered such experience in 1959-1960. An additional course, "Organization and Administration of Public Health Services," was taught in evening classes by Dr. Hampton Trayner, Spokane City Health Officer. Plans are under way for two more courses to add depth to the curriculum. These are also to be offered through evening classes and will be especially helpful to those nurses who are not recent graduates. They will be taught by Mrs. Dorothy Funk Corona, '48, and Mrs. Lulu Swope.

Strengthening of the professional nursing program to meet accreditation requirements is particularly important because Whitworth College is the only institution of higher learning in the Inland Empire area that grants a degree in nursing. It is also the only one offering a sequence of courses in preparation for public health nursing positions. Interest in the program, shown by the nurses of this area, is quite encouraging although there is a hesitancy on the part of some to enroll until the program is fully accredited.

'60 Evergreen Football Championship in View!

# Bright Outlook Becomes Brilliant Record

The Whitworth Pirates are on the march again! In the last issue of the *Campanile Call* the football outlook was called bright. The "bright outlook" has become a brilliant record. Fourteen wins in the last fifteen games is a two-season record worthy of great praise. In fifteen games the opposition has scored a total of 79 points to 441 for the Bucs.

The 6-0 record so far this year has brought a fifth place ranking in the national poll for small colleges. A vital part of the Pirates' attack is quarterback Dennis Spurlock. Denny is maintaining the national lead in total offense and passing yardage for all N.A.I.A. teams (as of publication date—not including the game with U.P.S., October 29). John Murio, Denny's prime target most of the time, remains near the top nationally, although he has dropped some having been used a great deal recently as a decoy more than a receiver. The most spectacular part of his performance is his uncanny ability at deceptive running once he has grabbed a Spurlock pass.

DENNY  
"The Arm"  
SPURLOCK

Many others have contributed significantly to the record so far, making it a definite team effort. Everyone deserves some special praise, but in pointing to outstanding play, Tom Black must be mentioned. As a senior tackle he has been outstanding on defense. His "point-after-touchdown" efforts have been a great asset as he has made 18 in 22 attempts and has a 1 for 1 record in field goal attempts.

With three games left to play—U. of P.S., October 29 (Homecoming, played just after deadline for this publication), E.W.C.E., November 5, to be played at the Spokane Memorial Stadium, and W.W.C.E., November 12, at Bellingham—Whitworth has great hopes of capturing the Evergreen Conference title for the second year in a row. Also, a 9-0 record could very likely bring Whitworth its first post-season bowl bid. Whatever the outcome it will have been a great season for Sam Adams' Pirates!

LEO  
"The Lion"  
HUTCHINS

Look out defense! JOHN "Hula Hips" MURIO has the ball.  
If you can catch him, you're better than most!

TOM "The Toe" BLACK splits the uprights again!

## New Coach — New Season

# BASKETBALL BEGINS WITH COACH KAMM

Coach Dick Kamm heads up the basketball coaching staff with Bill Cole assisting. With an entirely new look, it will be interesting to watch the progress of the team under the leadership of these two very capable young men.

Dick Kamm came to Whitworth from Seattle Pacific where he was assistant basketball and head baseball coach.

He went to Wheaton College for his B.A. degree and was a four-year letterman in basketball and baseball. Dick was captain of his basketball team in 1957 when they ended the season boasting a record of 28 wins and 1 loss.

Twenty-eight thousand miles and 72 basketball games were crowded into a short period of time as a member of the Ventures for Victory team, an honorary group of basketballers who toured the Orient playing ball and doing missionary work.

A very familiar name to Whitworth sports fans is Bill Cole. Bill's fame as a Pirate began in 1955 when he lettered in football as a freshman. He is continuing to make a vital contribution to the athletic program by assisting in football and basketball and instructing in Physical Education.

Pictured above are 3 of the 7 returning lettermen—Dave Morley, 6-3 guard, this year's captain; Jay Jackson, 6-5 center, a good scorer; Steve Weiting, 6-3 forward, last year's winner of "Most Inspirational Player" award.

January 21.....	Seattle Pacific
January 27.....	Western Washington
January 28.....	Pacific Lutheran
February 3.....	Eastern Washington
February 10.....	Central Washington
February 11.....	University of Puget Sound

# The Development Story

MR. ED WRIGHT

youth eagerly pursuing their studies. All seems to be going along so very well.

But lest we be lulled into a sense of false security we should not rest on our laurels. Nay, even more, we must not be content with future plans. We must be moving to goals now! To illustrate, let me quote from a recent publication from Eric Johnston.

"We live in an epoch of breakup, of peril, and of opportunity. We are seeing the breakup of nations and of traditions. We live under the peril of a nuclear force that can obliterate life itself.

"We have before us an opportunity—a magnificent opportunity—if we will but reach out to grasp it.

"Our choices are order or chaos. If it's to be order, there is only one launching pad to the future—and that's education.

"The old injunction to know thyself is no longer good enough. It is essential now to know your neighbor—in the same block, in the same town, in the same country, in the same world.

"Education in this era is the chief rudder of society, the delicate stabilizer in stormy seas. Society depends on education; in times of change, such as these times, society's dependence is very great.

"The whole citizen of today, of tomorrow, is the educated citizen. None else can preserve freedom."

Whitworth is rising to meet a challenge! If we believe in the Gospel and in its outreach through dedicated Christian Colleges then we must do something now! The College has a little gift for each person who will share in our great program. Won't you let us hear from you today?

Sincerely in Him,

EDWARD V. WRIGHT

Vice President in Development

A gift to Whitworth College from Mrs. J. D. Fall in memory of her mother, Mrs. Ada Hardwick.

## WHITWORTH COLLEGE CAMPANILE CALL

Spokane, Washington

Vol. XXVIII

NOVEMBER, 1960

No. 2

Co-Editors — Milton Erway, Roy E. Dimond

Second-class postage paid at the post office Spokane, Washington, Published January, March, May, July, September, November by Whitworth College, Spokane, Washington.

### Appointment Announced

### Director of Institutional Research

As an outgrowth of the summer long-range-planning conferences involving representatives of the faculty, administration, trustees, and alumni, the College has established an Office of Institutional Research. Dr. Leslie R. Beach, associate professor of psychology, has been appointed as Director. He will spend one-third of his time in the work of this office.

According to Dr. Beach, the function of the new office is two-fold. First, it will serve the administrative and development offices by gathering, analyzing and putting into usable form, any information regarding various phases of the total college program needed by these offices in planning and decision-making. Secondly, this office will serve as a co-ordination point for all research effort on the campus to insure its integration with the total long-range planning and development programs of the College.

The new office is now involved in a survey of faculty members which will provide a summary of faculty feeling and opinion regarding the future of Whitworth. Study is also being made of the use of College facilities, student attrition, and faculty grading. Close cooperation is being developed with the Faculty Research Committee in encouraging faculty research and in bringing to Whitworth support for the kind of research which we can do well.
